

Vinit Kumar

Principal Engineer · Django CMS Fellow

Pune, India | mail@vinitkumar.me | +91 85548 62210 | vinitkumar.me | github.com/vinitkumar | LinkedIn

SUMMARY

Principal Engineer with 13 years of building and running production back-end systems in Go and Python. Django CMS Fellow maintaining a mature open-source ecosystem, and author of `json2xml` (180k+ PyPI downloads a month).

EXPERIENCE

Scalefusion

Nov 2024 – Present

Principal Engineer, Pune, India

- Wrote the Linux client from scratch and own it end to end, supporting 22 Linux distribution and display environment combinations.
- Building the new Remote Cast solution with rooms, live annotation, and adaptive bitrate based on the display.
- Built the back end for the live SSH terminal service.
- Lead architecture of distributed back-end services in Go and TypeScript.

django CMS

Nov 2024 – Present

Django CMS Fellow (paid fellowship), Remote

- Maintain django CMS core, django-filer, and the plugin ecosystem; merged 52 pull requests across 29 repositories.
- Reviewed 330+ contributor pull requests; lead modernisation and compatibility work for new Django and Python versions.

KidsKonnnect

Feb 2023 – Nov 2024

Staff Software Engineer, Tech Lead (Websites & Onboarding), Pune, India

- Tech lead of the five-person Websites and Onboarding team, including QA; set the code review standards the team worked to.
- Owned the multitenant CMS behind 2,500+ customer domains: tenant provisioning, routing, and template isolation.
- Owned customer onboarding end to end, so new sites went live with no manual steps.
- Improved performance across the domain fleet, instrumented with New Relic and Sentry; built REST APIs with Django REST Framework.
- Managed cloud capacity and spend through auto-scaling and right-sizing, working with the hosting provider's DevOps team.
- Took on the legacy parts of the platform others avoided and left them easier to change.

Social Schools

Feb 2013 – Feb 2023

Senior to Staff Software Engineer, Pune, India

- Designed and built a multitenant CMS in Python serving 2,500+ school domains; cut page load times by 35%.
- Cut API response times from 400 ms to 120 ms.
- Led the enrolment form and CRM system: onboarding time down 40%, customer sign-ups up 25%.
- Built a distributed task queue on Celery and RabbitMQ: job execution time down 45%, 3x concurrent task capacity.
- Wrote a Go analytics tracker that halved data processing time.
- Reduced AWS costs by 20% through auto-scaling and instance right-sizing; built uptime monitoring that cut incidents by 30%.
- Led containerisation with Docker and Kubernetes for consistent local development; mentored engineers on Django and React.

OPEN SOURCE & COMMUNITY

- **json2xml** (author and maintainer): Python library with 180k+ PyPI downloads a month and 110 GitHub stars; ported to Go and Zig.
- **white paper**: top-10 Jekyll theme with thousands of downloads.
- Individual Member, Django Software Foundation (since Feb 2024).

SKILLS

Languages: Go, Python, TypeScript, JavaScript, Ruby, C

Back end: Django, FastAPI, Celery, RabbitMQ, PostgreSQL, MySQL, Redis, Elasticsearch

Infrastructure: AWS, Google Cloud, Docker, Kubernetes, GitHub Actions, Bitbucket Pipelines

Practices: System design, performance profiling, TDD (Pytest, Vitest), code review, mentoring

EDUCATION

Birla Institute of Technology, Mesra — B.E., Civil Engineering

2008 – 2012
